## Twenty Years Ahead! Tawford Ranges

Crawfords have but One Damper (patented); one motion controls fire and oven absolutely; slide the knob to "kindle," "bake" or "check"—the range does the rest. No damper mistakes. Ordinary ranges have the old

clumsy ash pan; troublesome, untidy. Crawfords have an Ash Hod (patented) into which all the ashes fall, far below the fire-making their disposal easy and cleanly.

The Coal Hod is beside it. Crawford Ovens have cup-joint flues that heat every part uniformly.

Crawfords have Patented Gratesmost durable, least trouble. Gas Ovens and Broilers at end or above range furnished if desired.
